Fleetco Management LLC · Dallas, TX · Founded 2022

CONFIDENTIAL — FOR INTERNAL & INVESTOR USE

1. Executive Summary

FleetCo Management LLC is a managed fleet operations company combining dedicated fleet management services with a proprietary SaaS platform. Founded in 2022, FleetCo serves owner-operators and small-to-mid-size carriers (1–50+ vehicles) who need one connected system for dispatch, maintenance, compliance, fuel optimization, and driver communication — without hiring a full back-office team.

The U.S. trucking and logistics sector includes over 750,000 for-hire motor carriers, the vast majority operating fewer than 20 power units. These operators lose an estimated 30% of revenue to inefficiency, downtime, and poor visibility across fragmented tools. FleetCo addresses this with transparent subscription pricing (\$299–\$599/mo for core tiers, custom enterprise quotes) and measurable client ROI: 15–25% reduction in unplanned downtime, 8–12% fuel savings, and \$2K+ average annual savings per unit.

The platform is live at <https://fleetcomanagement.org>, with an executive portal, customer portal, mobile driver app (iOS/Android), Stripe-ready billing, and PostgreSQL-backed production infrastructure. Year 1 (2026) targets 18 paying fleet customers and \$97K ARR. By Year 10 (2035), the base case projects 780 customers, \$5.71M ARR, and \$19.01M cumulative revenue over the decade.

FleetCo reaches EBITDA break-even in Year 5 and generates \$1.43M EBITDA in Year 10 at a 28% margin. Growth is driven by founder-led sales, digital marketing, referral partnerships with shops and fuel vendors, and expansion from Starter to Growth and Enterprise tiers as client fleets scale.

2. Company Overview

Legal name: Fleetco Management LLC

Website: fleetcomanagement.org

Headquarters: Dallas, TX

Contact: (360) 952-1249 ·

Founded: 2022

support@fleetcomanagement.org

Ownership: JaReil D. Slack & Desiree Slack, Owners

Mission

Give every fleet — from one truck to fifty — enterprise-grade operations, compliance, and cost control without enterprise complexity.

Vision

Become the trusted managed operations partner for 1,000+ North American fleets by 2035.

Core Values

- Transparency in pricing and performance
- Safety and compliance first
- Human support backed by modern technology
- Long-term partnerships over transactional sales

3. Market Analysis

Problem

- 5+ disconnected tools for dispatch, maintenance, fuel, compliance, and payroll
- 30% of revenue lost to inefficiency, downtime, and poor visibility
- DOT violations and missed PMs cost \$10K+ in fines and lost loads annually
- No single source of truth for fleet P&L and cost-per-mile

Target Segments

Segment	Fleet Size	Tier	Primary Need
Owner-operators	1–5 vehicles	Starter (\$299/mo)	Compliance, fuel optimization, parts sourcing, monthly reporting
Small fleets	6–15 vehicles	Growth (\$599/mo)	PM scheduling, priority support, quarterly budget reviews, safety coordination
Established fleets	16+ vehicles	Enterprise (custom)	Telematics integrations, dedicated account team, EV transition planning

Market size: U.S. for-hire motor carriers: 750,000+ · Addressable small/mid fleets (1–50 units): ~500,000 operators · Serviceable obtainable market (Year 1–3 focus: TX, PNW, Gulf Coast): ~45,000 fleets

Industry Trends

- Rising insurance and compliance costs pushing fleets toward managed services
- Driver shortage increasing demand for mobile-first tools and reduced paperwork
- Telematics and AI adoption creating appetite for unified dashboards
- Consolidation of point solutions into platform plays

4. Products & Services

Platform Capabilities

- Public marketing site with platform tour, services, and transparent pricing
- Executive portal — KPI dashboard, customers, fleet assets, dispatch, maintenance, analytics
- Customer portal — team roles, subscriptions, documents, media review
- FleetCo Driver app — time clock, loads, fuel logs, dashcam, barcode scanning, HOS/inspections

- AI Site Commander — intelligent site assistance and operational guidance

Managed Services

- Dedicated fleet manager per account
- Parts sourcing and vendor coordination
- Fuel optimization and IFTA-ready reporting
- Preventive maintenance scheduling and work order management
- Safety and DOT compliance coordination
- Monthly and quarterly business reviews (tier-dependent)

Pricing

Plan	Price	Fleet Size
Starter	\$299/mo · 1–5 vehicles · \$3,229/yr (10% off)	Up to 5 vehicles
Growth	\$599/mo · 6–15 vehicles · \$6,471/yr (10% off)	Up to 15 vehicles
Enterprise	Custom · 16+ vehicles · telematics & dedicated account team	16+ vehicles

Client ROI Claims

- 15–25% reduction in unplanned downtime
- 8–12% fuel cost savings through optimization
- \$2K+ average annual savings per truck/unit
- 100% compliance visibility across fleet documents and inspections

5. Competitive Advantage

- Hybrid model: managed services + proprietary platform — not pure self-serve software or traditional broker
- Flat monthly pricing by fleet size band — predictable vs. per-vehicle or per-load fees
- End-to-end stack: website → portal → driver app in one ecosystem
- Production-ready infrastructure with PostgreSQL persistence and data integrity protections
- Owner-operated company with direct access to leadership for every client

6. Go-to-Market Strategy

Phase	Tactics
Year 1–2	Founder-led outbound, website consultations, client presentation video, Google/LinkedIn ads, local fleet associations
Year 3–5	Inside sales hire, referral program with shops/fuel vendors, case studies, trade show presence (MATS, GATS)
Year 6–10	Regional sales managers, enterprise RFP responses, partner integrations (ELD, telematics), channel resellers

Sales funnel: Website visit → Free consultation → Live demo → Subscription signup → Account provisioning → Onboarding → Expansion (Starter → Growth → Enterprise)

Retention: Dedicated fleet manager relationships, quarterly reviews (Growth+), platform stickiness via operational data, annual contract discounts

7. Operations & Technology

Stack: Node.js/Express API · React/Vite frontend · PostgreSQL (Render) · Capacitor mobile apps · Resend email · Stripe billing integration

Delivery model: Remote-first operations with Dallas HQ; fleet managers assigned by region and fleet size

Support tiers: Email and phone support (Starter); priority support and quarterly reviews (Growth); dedicated account team (Enterprise)

Headcount Plan

Period	FTE	Roles
--------	-----	-------

Y1–2	2–4	Owners, 1 fleet manager, part-time engineering
Y3–5	6–10	+ sales, + support, + engineering
Y6–10	12–15	+ regional managers, + customer success, + enterprise specialists

8. Financial Summary (Base Case)

Year	Customers	Revenue	ARR (EoY)	YoY
Y1 (2026)	18	\$49K	\$97K	—
Y2 (2027)	42	\$169K	\$237K	248%
Y3 (2028)	85	\$367K	\$495K	117%
Y4 (2029)	145	\$690K	\$870K	88%
Y5 (2030)	220	\$1.12M	\$1.36M	63%
Y6 (2031)	310	\$1.70M	\$1.99M	51%
Y7 (2032)	410	\$2.40M	\$2.73M	41%
Y8 (2033)	520	\$3.21M	\$3.59M	34%
Y9 (2034)	640	\$4.11M	\$4.53M	28%
Y10 (2035)	780	\$5.20M	\$5.71M	27%
10-Year Cumulative		\$19.01M		

See companion PDFs: *Revenue Projections (10-Year)* and *Revenue P&L & Scenarios* for full detail.

Revenue Growth Trajectory

9. Key Milestones

- **Month 14 (~Year 2):** First \$100K ARR
- **Year 5:** \$1M+ ARR · EBITDA break-even
- **Year 7:** \$2.5M+ ARR · 410 customers
- **Year 10:** \$5.7M ARR · ~780 customers · ~4,500+ vehicles under management

10. Risk Analysis & Mitigation

Risk	Mitigation
Customer concentration early stage	Diversify across regions and fleet sizes; no single customer > 15% of revenue by Year 3
Churn in economic downturn	ROI-focused retention, annual contracts, essential compliance services
Competition from ELD/telematics incumbents	Managed services differentiation; integrations rather than replacement
Scaling fleet manager capacity	Platform automation, tiered support model, hire ahead of customer growth
Technology reliability	PostgreSQL production DB, data integrity guards, monitored deploys on Render

11. Use of Funds

- Sales & marketing (40%) — ads, content, trade shows, sales hires
- Fleet management & support staff (35%) — customer delivery capacity
- Product & engineering (20%) — mobile app, integrations, AI features
- G&A & infrastructure (5%) — hosting, legal, accounting

12. Assumptions

- Model start year: 2026 (Year 1 = first commercial year)
- Gross margin: 68%
- Churn: 10% (early) declining to 6% (Year 10)
- Billing mix: 70% monthly / 30% yearly (10% annual discount)
- Blended ARPU rises from \$450/mo (Y1) to \$610/mo (Y10) as mix shifts toward Growth and Enterprise
